

# CHRIS JONES RISK MANAGEMENT

## Benefits of using SafetyPlan

The flexibility of the SafetyPlan scoring regime allows an organisation to monitor improvements over time. Achievable targets can be set and improvements recognised. The scores achieved at succeeding audits serve to quantify improvements achieved in the Occupational Health and Safety management system.

Other features:

- Each element of the programme is given a multiplier to reflect the priority, 0 to 3;
- The audit includes a detailed assessment of documentation;
- Provision has been made to conduct employee and supervisor interviews, and record the results.

The ability to modify the priority of each element allows for appropriate weighting on both high and minor risks associated with different industries.

The actions necessary to increase the overall scores, as well as maintain continuous improvement, are documented in the "agreed action plan" section of the report. These actions are outlined in terms of the action required, by whom, and by when. They can therefore be readily integrated into key performance indicators and management objectives.

The individual criteria have been developed to encompass the requirements of state legislation and the Australian standard on OHS Management Systems.

**Chris Jones Risk Management provides a wide range of Occupational Health and Safety services and training, including:**

- ✓ OHS Audits – SafetyPlan; SafetyPlan Gold; AS 4801
- ✓ OHS programme implementation
- ✓ Risk Assessments
- ✓ OHS culture surveys
- ✓ Accredited training for construction induction and consultation (NSW)
- ✓ OHS training for management and supervisors
